PROFILE

INDONESIA DRILLING TRAINING CENTER

Indonesia Drilling Training Center (IDTC) is a specialized institution for drilling which developed by PT. Pertamina Drilling Services Indonesia to providing high-quality training and education in the field of drilling operations, typically within the oil, gas, and energy industries.

VISION

To become the leading provider of world-class drilling training center that can producing highly skilled professionals who drive the growth and safety of the global oil, gas, and energy industries through innovation and excellence

MISSION

- **Deliver Comprehensive Training Programs:** Provide industry-relevant, cutting-edge training for drilling professionals, from entry-level to advanced certifications, ensuring they are prepared for the challenges of the field.
- **Enhance Safety and Operational Efficiency:** Focus on improving safety standards, environmental protection, and operational excellence in drilling operations by equipping participants with the knowledge and skills required to prevent accidents and optimize performance.
- **Support Industry Needs:** Address the demand for qualified drilling personnel by offering tailored courses that align with the latest technological advancements, industry standards, and regulatory requirements.
- **Promote Sustainable Practices:** Foster a culture of sustainability by integrating practices that minimize environmental impact and ensure responsible resource extraction.
- **Continuous Innovation and Improvement:** Commit to the continuous enhancement of training methodologies and facilities, utilizing the latest technologies and feedback from industry experts to stay at the forefront of drilling training.

PROFILE

- Free Wi-Fi
- Antar Jemput Stasiun dan Hotel

PROFILE

TENTANG IDTC

Keunggulan IDTC

1) Praktik

IDTC mengedepankan aktivitas praktik dalam kegiatannya dan memiliki instruktur yang berpengalaman di industri Migas Indonesia dan Internasional

2) Custom

Silabus Pelatihan dan Kegiatan di IDTC dapat disesuaikan dengan kebutuhan dan tujuan Customer melalui proses konsultasi dengan Instruktur dan Assessor berkompeten

3) Update

Merujuk ke teknologi dan standard-standard di dunia pemboran yang terupdate dan kekinian dalam menyusun materi kegiatan

Fasilitas Praktek

- 1 Unit Rig 150 HP Rig PDSI #27.1/KB-150M
- Simulator Well Control
- Safety Equipment
- Peralatan Penanggulangan Bahaya H2S
- Peralatan Pemadaman Api
- Welding Workshop
- Peralatan Rigging dan Lifting
- Peralatan Scaffolding

PROFILE

TENTANG IDTC

Produk Unggulan

1) Sertifikasi Kompetensi

Bekerjasama dengan PPSDM Migas, IDTC melakukan paket pelatihan dan sertifikasi kompetensi untuk skema pemboran, perawatan sumur, Keselamatan dan Kesehatan Kerja (K3), Penanggulangan Bahaya H2S, Juru Las, Operator Scaffolding dan Operator Heavy Transport Equipment (HTE)

2) Pelatihan

Kegiatan pelatihan berbasis kompetensi maupun berbasis specific output di industri hulu migas maupun pelatihan mandatory seperti Basic Safety Training, Basic First Aid, Basic Fire Fighting dan Basis Sea Survival

3) Asesmen

Melakukan asesmen berbasis kompetensi untuk menganalisa gap kompetensi dan merekomendasikan rencana tindaklanjutnya

4) Konsultan

Jasa konsultan untuk aktifitas yang terkait Project Pemboran

5) Drilling School

Program pelatihan jangka panjang untuk pembekalan peserta fresh graduate menjadi tim Drilling di Lokasi Pemboran
